PCB Fact Sheet Final April 2010.pdf

Hi, Jeff –

Here's the ask for help from Michelle. At this time, it sounds like it's a quick turnaround for a fact sheet on the issue.

Maybe Kay or Judy could do it, based on their experience with fact sheets at emergency cleanups?

Please let me know if you want to chat about this further...

Cheers - Julie

Hi Julie-

I am so sorry, I was overwhelmed with meetings and other tasks and forgot to send you the email.

You captured it correctly though- I am looking for a fact sheet and participation in an upcoming public meeting organized by the school. There is no date for the meeting yet.

I would like to get a fact sheet routed to R5 next week for their buy-in. I have attached a draft fact sheet for a similar type of issue in Connecticut.

But I think our fact sheet should also pull from more recent guidance and also talk specifically to air ELE exceedances.

All the guidance docs:

<https://www.epa.gov/pcbs/polychlorinated-biphenyls-pcbs-building-materials>

Buildings Q&A with info on air ELEs: <https://www.epa.gov/pcbs/questions-and-answers-about-polychlorinated-biphenyls-pcbs-building-materials>

We expect a final proposed work plan from the school on May 25 and work to be complete in August. So community involvement would be likely to happen in late May, early August, and again in September when school starts.

Thanks,

Michelle Mullin

Hi, Michelle –

I just wanted to check in as I didn't see an email yet (and if you sent one, my apologies—I'm trying to be better with incoming emails).

So, for what you need on the Monroe school PCB situation, it would be...

What	When
Fact Sheet	?
Attendance/participation (presentation?) at a public meeting (<i>not</i> held or organized by EPA, right?)	?
??	

Please let me know if you want to chat through further what you need and/or what the situation is.

We'll figure out on our side who can help you out on this. ☺

Cheers – Julie
